

# OBSERVE, THINK, ACT!

# LIFTING

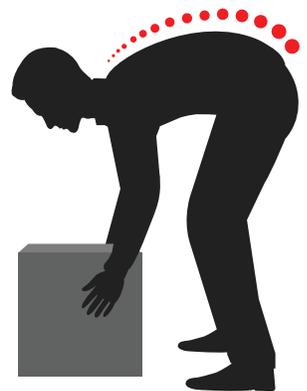

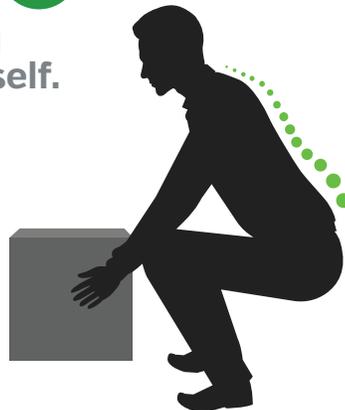

## The Safe Way

- **Never lift beyond your strength. Get help.**
- **Always crouch down to what you are going to lift. Don't bend down to the load.**
- **Get a good footing, placing your feet about shoulder width apart.**
- **Lift gradually. Don't jerk upward.**
- **Avoid twisting motions by shifting the position of your feet.**
- **Lift by standing up or pushing up with your leg muscles. This takes the strain off your back muscles.**
- **To put down a load, generally reverse the above methods.**

If you don't follow these safe-lifting rules, you may severely injure yourself.
